1. The disclosure is objected to because of the following informalities: the entire disclosure, specification and claims, do not conform with idiomatic English.

A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

All the claims are indefinite and incomplete. They do not conform with idiomatic English to the extent that it is unclear what is being claimed.

Further, they do not positively recite the structural features of the invention. Examples of features that have no antecedent basis and/or are not positively recited are – “ball bearings” Claim 1), “shaft” (claim 1), “inner wall part” (of what?)(claim1), “sleeve” (claim 1), “outer rings” (claim 1), “bottom wall” (claim 2), and “rolling groove” (claim 6).

The following are indefinite – “an inner wall part...bearings” (claim 1), “reaches up to the vicinity of the outer circumference” (claim 2), “hole linked to... formed” (claim 5), and “places separated...ring” (claim 6).

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
